

## Education in India

India's educational institutions are globally recognized for their quality and as good value for money. The tertiary level educational institutions in India offer a wide range of courses in the fields of Engineering, Medicine, Agriculture, Management, Humanities, Social Sciences, Fine Arts, Science and also in emerging areas of Bio-Technology, Bio-Informatics, Space Technology, etc. Indian universities are vibrant centres offering a multi cultural environment, with English as the medium of instruction.

Every academic year, both long and short term scholarships are offered, details of which are given below:-
